

April 2020

Dear Emergency Planning Zone (EPZ) Resident:

You have received this letter from Emera New Brunswick because you live or work within the Brunswick Pipeline's Emergency Planning Zone, an area extending 800 metres on each side of the Brunswick Pipeline. Emera New Brunswick, owner and operator of the Brunswick Pipeline, focuses its emergency planning and pipeline safety activities in this area.

The enclosed brochure, *Pipeline Safety Information for Residents, Businesses and Landowners*, is designed for Emergency Planning Zone residents, businesses and landowners like you and provides more information about the Brunswick Pipeline. It explains what to do when excavating or operating heavy equipment near the pipeline, how to recognize a natural gas pipeline leak, what to do in the unlikely event of an emergency and how to contact us.

We work hard to operate the Brunswick Pipeline safely and securely. As someone who lives or works near the Brunswick Pipeline, we count on neighbours like you to help us keep the pipeline safe. If you observe any unusual or suspicious activity near the Brunswick Pipeline, please call us toll-free at **1-888-410-2220**. For other inquiries or comments, you can email us at brunswickpipeline@emera.com.

We also welcome your feedback. After you review the brochure, please use the postage-paid feedback card to provide comments or ask questions. If you would like us to get in touch with you, please include contact information on the card.

Thank you for your time and attention to this letter and enclosed pipeline safety information brochure.

Sincerely,

Craig Arbeau, P.Eng.
Operations and Engineering Manager
