

April 2021

Dear Landowner:

You are receiving this letter because you are a registered landowner along the Brunswick Pipeline Right-of-Way, a natural gas pipeline owned by Emera New Brunswick.

We work hard to operate the pipeline safely and securely. As a landowner along the Brunswick Pipeline, you too can help us keep the pipeline safe. When planning any ground disturbance activities near the pipeline, please call **1-888-410-2220** or go to **clickbeforeyoudig.com** at least three (3) working days in advance of the planned activity.

Obtaining Brunswick Pipeline approval prior to beginning ground disturbance activities is not just a courtesy – it is the law under the Canadian Energy Regulator Act and a requirement of the Canada Energy Regulator (CER), Brunswick Pipeline's regulator. The CER may impose fines on landowners or companies for unauthorized activities near a pipeline. For more information on these regulations, please see the enclosed brochure or visit the CER website at www.cer-rec.gc.ca.

As a reminder, the following activities require prior approval from Brunswick Pipeline:

- Constructing a facility across, along, upon or under the pipeline or its easement;
- Using power-operated equipment or explosives to excavate near the pipeline;
- Conducting any activity on the easement, or within 30 meters of the pipeline, that disturbs more than 30 cm (12 inches) of ground below the initial grade, and/or reduces the total cover over the pipe; or
- Crossing the easement with heavy equipment.

Please note this list is not exhaustive. If you are in doubt about permissible activities, please call 1-888-410-2220 or go to www.clickbeforeyoudig.com.

Emera New Brunswick is committed to ongoing landowner engagement. That is why we periodically call landowners to discuss pipeline safety and review the information you are receiving today.

For any other inquiries, you can email us at brunswickpipeline@emera.com or call us at 506-693-4214 during business hours and select option 3.

Thank you for your time and attention to this letter and enclosed pipeline safety information. The safety information provided in this letter and the referenced brochure is available in French on our website www.emeranewbrunswick.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Craig Arbeau".

Craig Arbeau, P.Eng.
Operations and Engineering Manager
