Emera Brunswick Pipeline and NB Power to Hold Joint Emergency Exercise

Saint John, N.B. – Emera New Brunswick, owner and operator of the Brunswick Pipeline, along with NB Power, and the City of Saint John will participate in an emergency training exercise on Thursday, October 22, 2026, alongside local emergency responders. The exercise will take place between 9:00 a.m. and 1:00 p.m. in West Saint John near Pipeline Road.

Emera New Brunswick, NB Power, the City of Saint John, and the Saint John Fire Department place the utmost importance on safety. During this exercise, participants will work closely with a broad group of stakeholders to test emergency response plans, strengthen interagency coordination, and practice communications in a simulated emergency scenario.

Training exercises provide emergency responders, municipal partners, and industrial stakeholders with an opportunity to work together, validate emergency response procedures, and enhance preparedness for real-world events.

In addition to Brunswick Pipeline and NB Power personnel, participants will include representatives from the City of Saint John, the Saint John Fire Department, the New Brunswick Emergency Measures Organization (NB EMO), and other local stakeholders.

Area residents may notice emergency response vehicles and increased activity in the area during this time; however, no traffic disruptions or impacts to local homes or businesses are anticipated.

About Emera New Brunswick

Emera New Brunswick, owner of the Brunswick Pipeline, is a wholly owned subsidiary of Emera Inc. (EMA-TSX), a geographically diverse energy and services company headquartered in Halifax, Nova Scotia. Brunswick Pipeline delivers natural gas, from the LNG terminal in Saint John, New Brunswick, to markets in Canada and the US Northeast. Visit Emera New Brunswick's website at www.emeranewbrunswick.com.

About NB Power

As New Brunswick's power company, NB Power is responsible for the generation, transmission and distribution of electricity that powers the homes, businesses and communities of more than 400,000 customers. With 14 hydro, coal, oil, natural gas and diesel-powered generating stations as well as the Point Lepreau Nuclear Generating Station and the Shediac solar farm, NB Power maintains and operates one of the most diverse generation fleets in North America and the only nuclear generating station in Atlantic Canada. NB Power is committed to enhancing New Brunswickers' lives by providing clean, competitive and reliable energy solutions. Part of this commitment includes investments in energy efficiency programs, energy solutions, renewable energy sources and smart grid technology.
